

Electric Space Heater

The Electric Space Heater is a fan forced heater designed for heating or drying purposes in a well insulated, draught free environment. Suitable for use in damp & wet areas they emit a gentle warm airflow, taking the chill out of the air instantly. Multiple heat settings are available, the Electric Space Heater can also be used as a fan on those hot days where only air circulation is required.

Uses	Applications	Features
Heating Drying	Offices Lunch Rooms Showrooms	Adjustable Thermostat Control Overheat Protection Full Metal Casing Lightweight & Portable Insulated Handle Tip Over Switch

SPECIFICATION	
Model No	HES2.4
Heating Output	2400W
Voltage	220-240V 50Hz
Plug Connection	3 Pin 10A Plug
Heating Area	12m ²
Air Output	57L/s
Gross Weight	5.5kg
Net Weight	4.9kg
Product Measurement (mm)	335*250*375
Packing Measurement (mm)	350*265*390

FANMASTER
COOLING HEATING VENTILATION DISTRIBUTION
